GLAFHS is an enterprise managed by a dedicated and determined team of multi-disciplinary professionals with a mission to bring in a paradigm shift in the business of greening and farming by setting-up new standards.

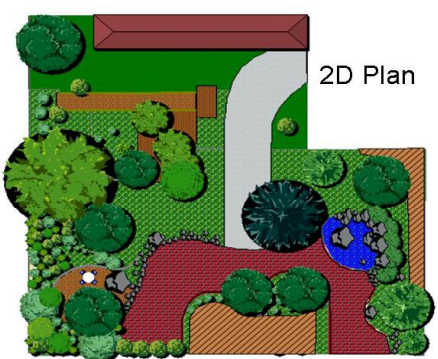

Our vision is to inculcate and strengthen the people's desire to go green and conserve environment.

LANDSCAPING DIVISION

Our landscape gardening business includes Designing, Construction, Maintenance and supply of Plants (on retail, wholesale & rental basis).

DESIGN SERVICES

Our garden designs gain inspiration from nature and endeavour to work within the natural contours of a plot using natural materials and complimentary planting.

2D Plan

3D Visual

3D Visual

Following initial consultation, if you are happy to commission, we will create your design using 2D & 3D computer programs. This enables your personal design to be viewed not only as a scaled ground plan but also as 3D images.

Our priority, however is to produce for each client a garden incorporating their individual requirements. To achieve this we will take your achievable key elements, together with our unique ideas, to form a harmonious natural styled whole.

Once your design has been completed we will arrange a convenient viewing appointment where design will be explained and discussed, make any minor alterations, show samples of materials we would recommend and advise on plant types etc. Client will then receive a pen-drive containing your personal design and a copy of the scale plan.

2D Plan

IRRIGATION DESIGN AND INSTALLATION

It is very important for long-term success of any garden. We install both manual (garden taps) & automated (computer controllers) systems. GLAFHS also undertakes landscape construction on designs provided by client's design team. Besides, we provide Project Management Consultancy (PMC) to monitor the vendors and complete the landscape works to the utmost satisfaction of the client within stipulated time. We realize that each client's requirements and plot sizes vary, so please contact us either by phone or e-mail for a design service quotation.

CONSTRUCTION SERVICES

GLAFHS offers a comprehensive service for implementation of both hard and soft landscape elements which include:

- Soil & water testing and conditioning
- Site survey and development
- Earthworks and Grading
- Irrigation and Land Drainage
- Plants (Trees, Shrubs, Ground covers, Climbers and others) supply and plantation
- Tree Pruning and Shaping
- Minor Building Structures
- Paving and Driveways
- Fencing
- Retaining Walls
- Sports Facilities
- Water Features
- Interior Landscaping
- Timber Structures

We specialize in constructing miniature and large forests in urban homes, townships and institutions; urban regeneration projects and fast track small & large scale instant impact landscape gardens.

MAINTENANCE SERVICES

Proper maintenance is very crucial for any landscape garden. Even the most well designed garden can turn into ruins if it is not regularly cared for. GLAFHS offers 1-5 year aftercare and defects service for this critical establishment period.

We have the expertise to develop a care program to best suit your garden requirements. Our programs typically include:

- Pruning, Trimming, and training of plants
- Management of weeds, soil health and fertility
- Pest and disease Management
- Lawn Care (including mowing, edging, fertilizing etc.)
- Management of irrigation systems
- Care and management of hardscape and water features
- Regular communication with the client for addressing their requirements.

NURSERY PLANTS AND GARDEN ACCESSORIES

Apart from our own stock, we have strong linkages with reputed nurseries spread across India to supply Trees (including ornamental, palms, cycads, fruit trees, Bonsai etc.); Shrubs & Herbs (ornamental, culinary, medicinal etc.); Vines; Ground covers; Grasses (ornamental and lawn grasses); Topiaries; Bulbous plants; Seasonal flowers of best quality at competitive prices.

GLAFHS also has a wide sourcing network to provide garden accessories viz. tools and tackles, lawn mowers, sprayers, pots/containers, plant protection and plant growth enhancing organic & inorganic chemicals, leaf mold, Bio-compost etc. for its clients throughout India.
